PROFILE

HND Software Engineering graduate with an Overall Distinction and a strong interest in software development, application development, UI/UX design, and game development and design. Experienced in developing academic and personal projects using C#, Python, Java, SQL, HTML, CSS, JavaScript, PHP, MySQL, Unity, and database technologies, with practical exposure to object-oriented programming, data structures and algorithms, systems analysis and design, Git/GitHub, data analytics, and introductory machine learning. Also experienced in Figma, wireframing, prototyping, web and mobile interface design, usability testing, and A/B testing. Creative, adaptable, and motivated entry-level developer with strong problem-solving, teamwork, communication, research, and presentation skills, eager to contribute to real-world software projects while continuing to develop skills in game development, game design, UI/UX, and Artificial Intelligence.

TECHNICAL SKILLS

C# Programming - Moderate	Systems Analysis & Design - Good
Python - Moderate	UI/UX Design - Good
Java - Moderate	Figma - Good
HTML, CSS & JavaScript - Good	Wireframing & Prototyping - Good
SQL / Database Management - Moderate	Web & Mobile Interface Design - Good
PHP & MySQL - Moderate	Usability Testing & A/B Testing - Good
Git/GitHub - Moderate	Draw.io - Good
Unity 2D Game Development - Moderate	Research Methodology - Moderate
Data Analysis - Moderate	
Machine Learning - Beginner	

EDUCATION

BSc (Hons) Artificial Intelligence (Top-Up) - Planned

[Kingston University, UK](#) | [Study through ESOF Metro Campus, Sri Lanka](#)

Planned next academic progression following completion of the HND in Software Engineering.

Higher National Diploma (HND) in Software Engineering - Overall Distinction

Jan 2025 - Sep 2026

[ESOF Metro Campus, Jaffna, Sri Lanka](#)

Graduated with an Overall Distinction. Completed practical work across UI/UX design, web development, software development, systems analysis and design, databases, data analytics, AI/ML, research methods, and software engineering. UI/UX-related projects included Enomy-Finances, Velvet Vogue, ETCP web and mobile designs, and Fresh Grocers.

Diploma in Information Technology (DIT) - Overall Merit

Apr 2021 - Sep 2021

[ESOF Metro Campus, Negombo, Sri Lanka](#)

Achieved an Overall Merit while developing foundational knowledge in computing, programming, databases, and information technology.

G.C.E. Ordinary Level (O/L)

Apr 2012 - Mar 2021

[OKI International School, Negombo, Sri Lanka](#)

Results: English - B | Mathematics - S | Business Studies & Accounting - C | History - S | ICT - S

Diploma in Hospitality Management

Aug 2024 - Nov 2024

[British College of Hospitality Management, Jaffna, Sri Lanka](#)

Diploma in Professional Cookery

Sep 2024 - Jan 2025

[British College of Hospitality Management, Jaffna, Sri Lanka](#)

PROJECTS

FoodHub Restaurant Management System

Jul 2025 - Aug 2025

[C#](#) | [Windows Forms](#) | [SQL Server](#)

Developed a database-driven restaurant management system with CRUD operations for customers, riders, orders, items, ingredients, and related records.

AI-Driven Cyberbullying Detection Prototype

Aug 2026 - Sep 2026

[Python](#) | [Machine Learning](#) | [NLP](#) | [TF-IDF](#) | [Logistic Regression](#)

Developed a Python proof-of-concept for detecting potentially toxic communication in online gaming environments, classifying messages, assessing risk using previous incidents, and recommending moderation responses.

Dream Book Shop - Book Data Analysis Python Pandas Matplotlib OOP SOLID Developed a command-line data-analysis prototype using British National Bibliography data to analyse publication trends, authors, languages, publishers, missing ISBN records, and books per year.	2026
Doctor Channelling System Data Structures & Algorithms ADT Sorting Designed core doctor-channeling functions including patient and doctor registration, search, appointment booking and cancellation, notifications, patient-stack operations, and Merge Sort.	2026
Athupas Stores Sales Data Analytics Python Pandas Data Analysis Data Visualization Analysed retail sales data to identify trends, product and category performance, and seasonal patterns, and developed visualisations and a dashboard to communicate business insights.	Apr 2026 - Jul 2026
Unity 2D Game Development - Snake & Table Tennis Games Unity C# 2D Game Development Developed Snake and Table Tennis games using Unity and C#. Implemented player movement, collision handling, scoring, paddle and ball controls, computer-controlled gameplay, and game management, gaining practical experience in both game development and interactive game design.	Feb 2026
Enomy-Finances - Financial Services Web System SDLC UI/UX Prototyping System Design Draw.io Designed a prototype financial-services system with interfaces for login, registration, dashboard, savings and investments, mortgages, currency and transaction processing, and inquiry management while applying SDLC and user-centered design principles.	2026
Velvet Vogue - Fashion E-Commerce Website Web Design & Development UI Design HTML CSS JavaScript Designed and developed a fashion e-commerce website with attention to clear navigation, visual consistency, interface structure, and an accessible shopping experience.	2025
Fresh Grocers - Grocery Ordering System Systems Analysis & Design UI/UX System Modelling Draw.io Designed system flows and interface concepts supporting customers, customer service representatives, delivery personnel, and administrators, covering ordering, automatic delivery-agent assignment, notifications, inventory, and administration.	2026
Eco-Tourism Cloud Platform (ETCP) - UI/UX Design UI/UX Figma Web & Mobile Design Wireframing Prototyping Usability Testing Designed user-centered web and mobile interfaces for travelers, service providers, and administrators. Created wireframes and prototypes and refined designs through usability and A/B testing, focusing on navigation, accessibility, consistency, and user experience.	Jul 2026
Healthcare AI Anomaly Detection Research Research Methods Quantitative Analysis AI in Healthcare Conducted research on real-time validation of AI-driven anomaly detection in healthcare networks, covering data quality, feature selection, real-time processing, reliability, survey design, and statistical analysis.	2026

ACHIEVEMENTS

Research Presenter - EICON 2026 ESOFT International Conference 2026 Successfully presented the research “AI-Driven Real-Time Cyberbullying Detection and Prevention Framework for Online Gaming Environments” as an E-Poster and received a certificate of presentation.	Aug 2026
---	----------

COURSES & CERTIFICATES

Certificate in Web Development IEBT Campus Covered HTML, CSS, JavaScript, PHP, MySQL, and fundamental web design and development concepts.	Nov 2025
---	----------

SOFT SKILLS

Creativity | Problem-Solving | Teamwork | Communication | Adaptability | Time Management | Research & Presentation

EXTRACURRICULAR ACTIVITIES & INTERESTS

Basketball | Table Tennis | Swimming | Reading

LANGUAGES

Tamil - Native | English - Advanced | Sinhala - Good | German - Beginner
